Tile colours shown of the tile product on this data sheet are as accurate as the timitations of the printing process will allow. Due to the manufacturing process of all floor tiles there may be small resistance. The slip resistance values provided are accurate at the time of testing and represent the standard production value. Please note, inadequate cleaning and maintenance will lead to a sig the slip resistance of any tiles. The pendulum test results are displayed in line with The Health & Safety Executive guidelines whereby 0 - 24 represents a high slip potential, 25 - 35 signifies a most and 36<sup>+</sup> represents a low slip potential. All rigures are accurate at the time of this data sheets creation (19/05/2024). Johnson Tiles Limited, Harewood Street, Tunstall, Stoke-on-Trent. ST6 5JZ. No. 15600432.0 2024 Johnson Tiles.
